

ISO 9001 Registered Company  
Accredited Calibration Laboratory

# QuestSuite® Professional

*The “System Solution” Software Application*

## **ONE SYSTEM SUPPORTING ALL THESE APPLICATIONS:**

- *Noise Dosimetry*
- *Octave Band Sound Analysis*
- *Thermal Comfort Monitoring*
- *Toxic Gas Dosimetry*
- *Instrument Inventory*
- *Industrial & Community Sound Surveys*
- *Area & Personal Heat Stress Monitoring*
- *Confined Space Entry Testing*
- *Indoor Air Quality Assessment*
- *Calibration Management*

QuestSuite® Professional provides a "system solution" for recording, reporting, charting and analyzing occupational and environmental exposures to the multitude of environmental hazards measured by your Quest datalogging instrumentation. No longer do you have to switch between multiple software applications from multiple vendors, spend hours trying to merge incompatible data files and formats for reporting purposes or search endlessly for where all your data files are stored.

### What's NEW with QuestSuite Professional

- Simplified browser-like user interface ✓
- More powerful charting and reporting functions ✓
- Enhanced data editing functions ✓
- Enhanced data integrity and record management ✓
- Database of all your monitoring instrumentation with automatic notification of calibration due dates ✓
- Link directly to the Quest Technologies website for product and support information ✓
- Link to Quest Technical Support staff for assistance with all Quest hardware and software ✓
- Modem communications support for remote data access ✓
- Built-in diagnostics log ✓

See side of box for systems requirements

### QuestSuite Professional

allows you to:

- Reduce the time and skills required to turn data into meaningful information
- Eliminate the need for multiple software applications from multiple vendors
- Easily share information electronically with others
- Maintain credible records of exposure histories
- Keep track of all your monitoring instruments, their calibration history, and their next calibration due date
- Instantly access all your important monitoring information
- Quickly and easily chart and report monitoring results
- Select charting styles you prefer using only the data you choose to display
- Annotate charts with free-form remarks
- Append data files with user comments and test identifiers
- Configure instrument setups & program instruments with "point & click" ease
- Store instrument setup files for quick and easy reuse
- View, print, email and export reports, charts and data files
- Link to Quest Technical Support from within the application
- Obtain revision updates via the Internet

## Compatible Quest Instruments

**Noise & Sound**

- Q-100
- Q-300
- Q-400
- Q-500
- 1900
- 2900

**Gas Detection**

- MultiLog 2000
- SafeLog 100

**Indoor Air Quality**

- aq-5000-q
- aq-5000 Pro
- aq-5001-q
- aq-5001 Pro

**Heat Stress**

- QUESTemp °II
- QUESTemp °III
- QUESTemp °34
- QUESTemp °36

**System Requirements:** CD-ROM Drive, PC Pentium Processor, 64 MB of RAM, 20 MB free disk space, Windows® 98 or better, 800 x 600 resolution, Free serial port to allow communications with our instruments, Printer supported by Microsoft® Windows®
